

## Layer2 **AUTO TAGGER** for SharePoint

COMPATIBLE WITH

PART OF THE **Layer2 KNOWLEDGE MANAGEMENT SUITE** for SharePoint

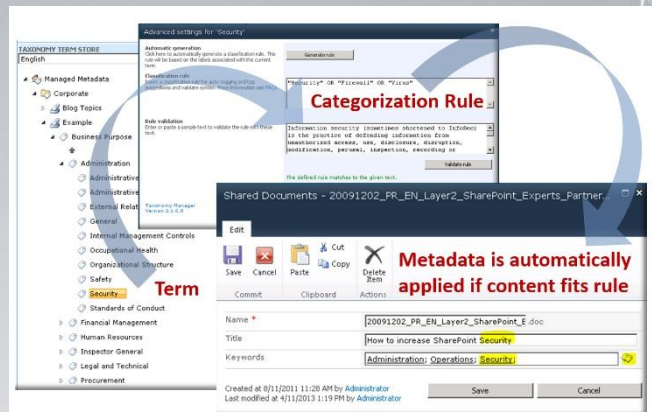

### Features & Benefits

**The Layer2 Auto Tagger for SharePoint** completely automatically classifies Microsoft SharePoint list items and documents in real-time or background by assigning appropriate managed metadata organized in the SharePoint Term Store. By default SharePoint offers a manual tagging feature only:

- Helps users of Microsoft SharePoint to find items and documents quicker and more efficiently using managed metadata filters and navigation.
- Helps to navigate SharePoint lists and libraries with more than 5.000 items – otherwise not possible.
- Increased productivity and precision while bulk-tagging SharePoint items and documents automatically using a robust multi-level rule-based auto-classification system, based on given taxonomies.
- Could be helpful for initial bulk-tagging, e.g. after content migration from any system to SharePoint, as well as for daily operation in real-time.
- The taxonomy entry point (root node) is chosen automatically with respect to the current managed meta data column settings.
- List items are processed as well as documents and files located in SharePoint libraries.
- Installed IFilters are used for document content analysis, e.g. for Word, Excel, PowerPoint, PDF and many more.
- Use of categorization rules is optionally supported (e.g. one term is in document content while another term is not). High quality of subject classification using a high performance Microsoft .NET Framework based rule engine.
- 100% SharePoint technology: The solution is completely based on the Microsoft SharePoint 2010 and 2013 Enterprise Metadata Management API. No MOSS 2007 legacy code or external 3rd party tools.
- You can also classify any **external data source** to use with the SharePoint Knowledge Management and Social Networking features with the help of the Layer2 Business Data List Connector for SharePoint.

*"We were able to successfully use the tag rules, tag suggestions and the auto-tagging features in your KMS product. Great product and thanks for offering it at a reasonable price point."*

Andy Stout, CMC Group

### Licensing & Partner Program

- Free Shareware Edition available on web site: Just register, download and use.
- Server license: US\$ 1.205 / 890 € per WFE/APP Server.
- Optional: Annual Software Assurance 20% per year.
- Also available as a component of the Layer2 Knowledge Management Suite for SharePoint.
- Partner program: Cost-free, 30% discount, free NFR editions for internal use, priority support, lead transfer, joint development.
