

## SQL Server Codeless Data Integration and Synchronization

### Features & Benefits

The Layer2 Cloud Connector can integrate and sync your Microsoft SQL Server data with various other corporate data sources, applications and systems – on-premises or in the cloud - codeless and in just minutes:

- Connect and sync MS SQL Server data to 100+ other sources via ADO.NET, one-way or even two-way.
- No touch data integration: Does not require any customization or installation on both sides of sync.
- No programming or complex tools like SSIS required: Setup in a few minutes guided by a wizard. Sample connection templates included.
- Flexible data query and mapping: SQL query syntax. Views and stored procedures supported.
- Reliable architecture: A connection is established just for data synchronization – not for general usage in the connected systems. All system features are fully available for your synchronized SQL data.
- Secure data transfer: The connector runs as a Windows service on a server in your corporate network where it could reach the connected systems. No data is exposed to any 3<sup>rd</sup> party.
- High performance: Works great with large data sets.
- 100+ data sources supported: ODBC, OLEDB, OData, .NET-based providers, Excel/XML, Text/CSV, MS Access, Oracle, MySQL, IBM DB2, IBM AS/400, IBM Informix, PostgreSQL, SharePoint, Office 365, OneDrive 4B, Dynamics CRM/ERP, SAP, Microsoft Project, Active Directory, Exchange, Lotus Notes, XML/SOAP Web Services, File system etc.
- Many 3<sup>rd</sup> party data providers supported: Amazon, Azure, Google, Twitter, Facebook, Salesforce etc.
- Sync SQL data with SharePoint and Office 365 one-way or two-way: Views, lookups, search, change notifications, workflows, mobile and offline access.
- Cost-effective solution: One-time fee. No user CALs. End-users don't need SQL licenses.

*“Simple and easy to set up and install. Once you have your connection strings set up, it just does its thing without any attention or effort needed. Support is quick to respond and knowledgeable. Program seems 100% reliable so far.”*

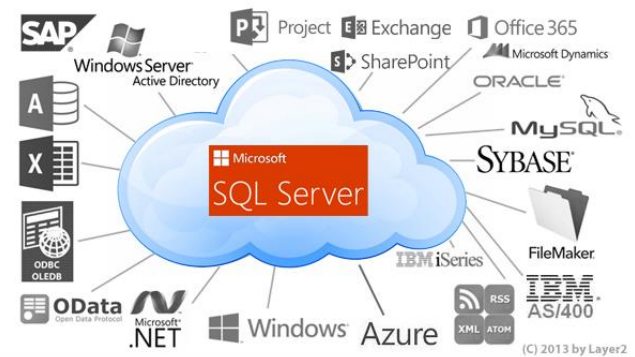

**Adam R. Imbruglio,**  
IT Systems Support Specialist, Lifespan

### Licensing & Partner Program

Licensing per installation. No user CALs required:

- Free Shareware Edition available for download.
- Personal Edition: UD\$ 499 / 399 €
- Professional Edition: US\$ 1.407 / 995 €
- Annual Software Assurance: 20% per year.
- Layer2 Partner Program for VARs and system integrators: 15-30% discount, free NFR Edition, priority support, web site listing, lead transfer.
